

DECEMBER 2020

Merry christmas and happy new year

Dear partners,

We would like to send all of our best hopes and wishes for you and your families here in a difficult Corona time, where we all face a different Christmas holiday.

Allow me to introduce myself as new member of the Mutag-family - my name is Jesper Brix, 46 years old and living in Denmark with my wife and 3 kids. In February this year, I started at Mutag with responsibility for sales and took over as CEO from July 1st. I am happy to be part of a company that supports sustainable solutions within watertreatment. My background is 32 years in the same company with foamed products in PU. I was mainly involved commercially with sales, projects and developing long term partnerships.

THANK YOU

Unfortunately, these past months, we have not been able to visit and talk to you who are connected with Mutag AG, either directly as a customer or cooperation partner. Due to COVID-19 we have been limited in our mobility and thus also travel activity. We have tried to reach as many of you as possible either via digital video conference or other virtual media. It is and will not be the same as meeting face2face, shaking hands and thus creating new important relationships for the future. I would like to regret that this has not been possible, and at the same time thank you all for the patience and understanding you have shown in this difficult and unusual situation.

WE ARE READY TO HELP YOU

I would like to invite you to contact me or my high-skilled colleagues at the office in Chemnitz or Aue, we are always ready to help you with new or existing projects. We are proud to offer competent counselling within complex calculations of your plant, ranging from efficiencies and quantities of Mutag BioChip-30™ to dimensioning of pumps and pipes as well as sparring and support during commissioning of your new plant. We have recently launched a new concept around Energy- & Feasibility Check, as a new after sale service option. We offer support for a technical review of your existing plant and a possible recommendation with any opportunities for improvement. We strive for continuous improvements and innovative initiatives to optimize with high focus on sustainability and responsibility in relation to the environment we are in. We look forward to hearing from you.

DEVELOPMENT OF MUTAG BIOCHIP 30™

After [Lynddahl a/s](#) has joined as owner and partner, we have spent energy on further analyze and development of our unique Mutag BioChip 30™. In the new year, we look forward to introduce larger surface area and thus higher efficiency where you can save significantly - both space and energy when building a new plant.

With these words, we at Mutag, would like to wish you a merry Christmas and a happy and prosperous New Year! We thank you for the cooperation in the past year and look forward to 2021!

Best regards,

Jesper Brix, CEO
